The Theory & Practice of Stereoscopic Production (3D Movies) and Complimentary Sound Techniques

A workshop that integrates the functions of the human visual system and hearing, with the techniques required to practically produce Stereoscopic productions

This 2 day workshop will concentrate on the theory and practice of live Stereoscopic capture with dual camera rigs through post production including ortho-stereoscopic correction through to the delivery systems

Places are limited so book early to avoid disappointment

The workshop will be held at **Pinewood Studios** with support from ARRI Media, Quantel, P+S Technik and Codex and run in conjunction with leading industry trainers

Workshop dates are
2nd December & 4th December 2008

Fee: £295

For further information & booking please e-mail training@hddc.co.uk
